👤 PROFILE

PhD candidate in natural language processing, working on claim detection, evidence retrieval, and explainable fact-checking for online misinformation, with 3 years of prior industry experience building ML platforms, payment systems, and leading back-end teams at production scale. Comfortable across the full stack, from formulating research questions and training models to shipping them as reliable services. Looking for research roles where both halves matter.

🎓 EDUCATION

PhD Computer Science | Queen Mary, University of London | U.K. Oct. 2023 – present
M.Sc. Computer Science | University of Passau | Germany Apr. 2017 – Feb. 2020
BEng Internet of Things Engineering | Huaqiao University | China Sep. 2011 – Jul. 2015

📖 PUBLICATIONS

- **RAVE: Retrieval and Scoring Aware Verifiable Claim Detection.** Y. Li, A. Zubiaga. *IEEE International Conference on Acoustics, Speech and Signal Processing (ICASSP)*, 2026.
- **FineDialFact: A Benchmark for Fine-grained Dialogue Fact Verification.** X. Chen, Y. Li, Y. Gan, A. Zubiaga, M. Purver. *Language Resources and Evaluation Conference (LREC)*, 2026.
- **FactFinders at CheckThat! 2024: Refining Check-worthy Statement Detection with LLMs through Data Pruning.** Y. Li, R. Panchendrarajan, A. Zubiaga. *Working Notes of CLEF*, 2024. [1st place, English subtask]

🏢 PROFESSIONAL EXPERIENCE

Senior Software Engineer | Hongma Tech | Nanjing, China Jun. 2022 – Sep. 2023

- Led back-end architectural design and team building for customised business systems.
- Delivered an EV charging station management platform with Java/Springboot.
- Built a cross-border e-commerce platform with order, payment, and admin management modules.

Data System Development Engineer | Meituan | Beijing, China Jun. 2021 – Apr. 2022

- Built a Kubernetes-based model management & deployment solution with 30+ RESTful APIs.
- Developed offline batch inference on large datasets via tf.data API and Spark Partition.
- Contributed to the ML platform powering Meituan's web services (2,000+ daily users).

Software Development Engineer | JD.com | Beijing, China May 2020 – Mar. 2021

- Co-built the Dolfon Wallet (Thailand) payment chain infrastructure.
- Developed Dubbo-based RPC APIs for cross-system data synchronisation and real-time reporting.
- Drove an automatic file-reconciliation parsing module and alleviated production SQL issues.

⚙️ IT SKILLS

- **Programming:** Java | Python **Big data:** Hadoop | Spark | Hive
- **Database:** MySQL | MongoDB **Frameworks:** Springboot | Mybatis | Zookeeper
- **APIs:** RESTful | RPC (Dubbo) **Others:** Linux | Git | Docker | IntelliJ IDEA | PyCharm

🗣️ LANGUAGE SKILLS

English (IELTS 7.0) | Chinese (Native) | German (B1)
